
Bass Stool

Ideal for bassists, guitarists, and percussionists, the Bass Stool's considerate design offers hours of superior comfort for musicians. Available with and without a backrest, and with fixed or adjustable legs.

***RAT*stands**

Product Features

The stool is available with or without a backrest. The seat and backrest are manufactured from thick padded foam, and upholstered in a high-quality and durable charcoal fabric, which provides firm but comfortable support for hours. The stool provides firm but comfortable support for hours and is ergonomically designed to encourage good posture. The backrest provides lumbar support where it is needed and does not restrict the musician's arms and shoulders.

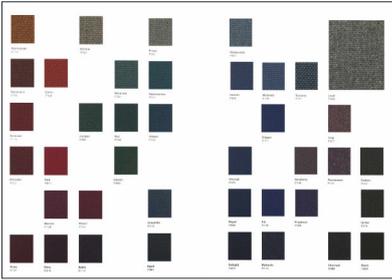

The sturdy foot rest offers support for the musician whether they are sitting at the back of the seat or for those to perch at the front of the seat. The solid steel chair frame is coated in a black textured polyester powder for maximum durability and a sleek finish.

The stool is available with adjustable legs which allows the height of the stool to be raised and enables the chair to stand level on an uneven or sloping floor such as a raked stage.

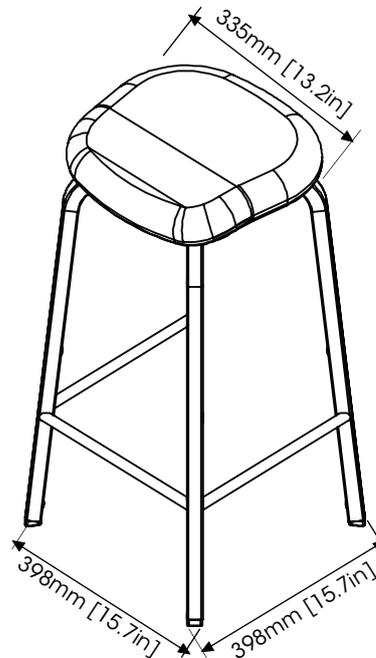

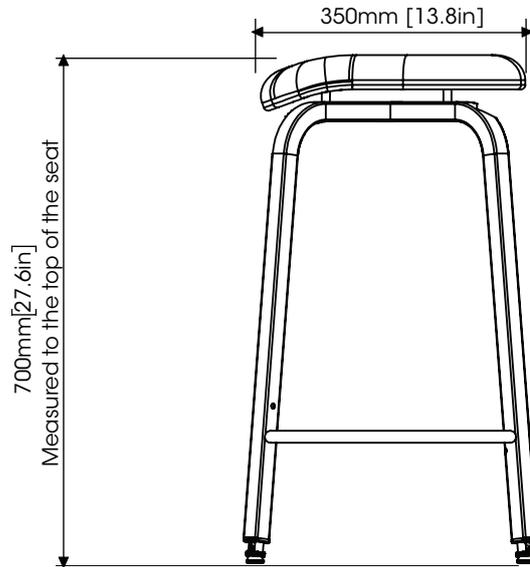

The Bass Stool can be stored in a near vertical stack, on a flat floor, which is ideal when there is restricted space.

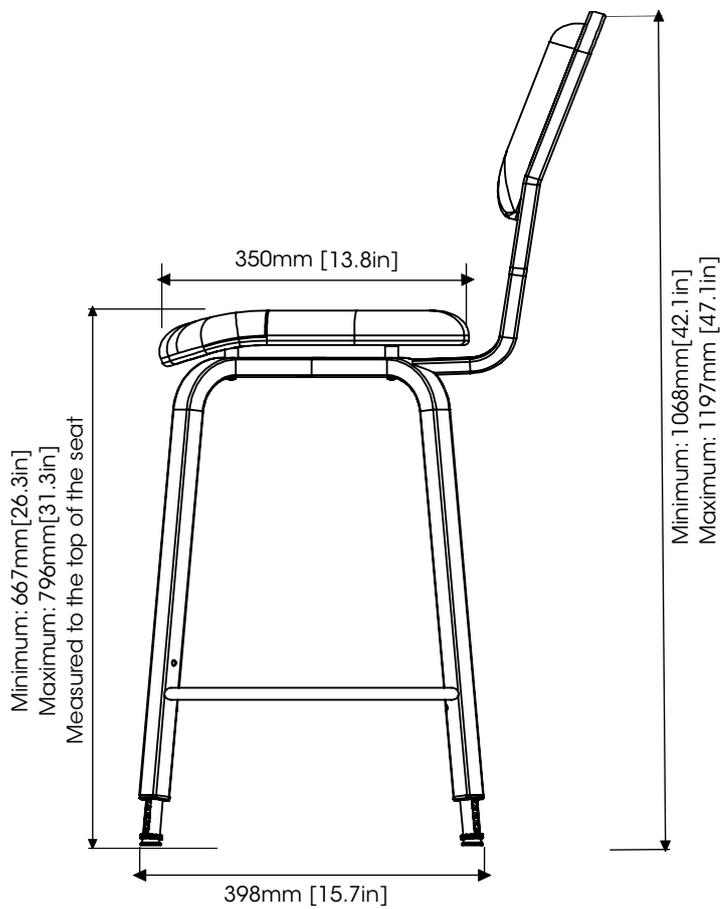

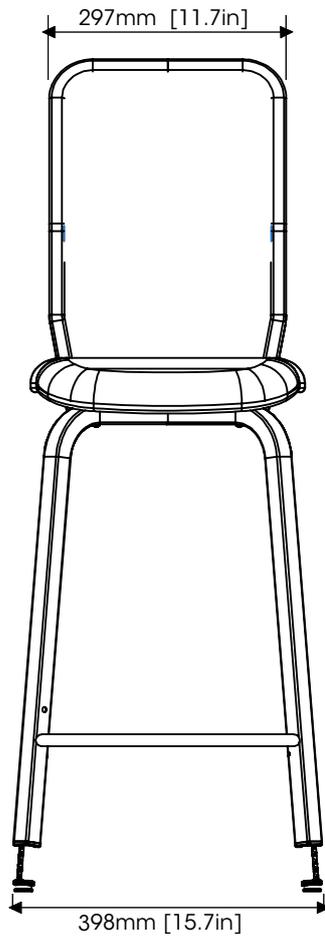

The chair's standard charcoal fabric is sophisticated and minimal. We offer a range of upholstery colours for a custom look to ensure stand out performances.

Without Backrest

With Backrest

Detailed Specification

Specifier's description
