# Extra Wide Double Lip Concert Stand

A classic stand designed in contemporary style. The Concert Stand's slender metal stem and elegantly formed natural wood tray perfectly complement the appearance of a modern or historic concert hall. Trays can be stained to match the appearance of the hall. This stand is perfect for professional musicians, on stage in the world's top performing arts venues.

---

**RAT**stands

The elegant wooden tray is formed from one piece of natural birch, sourced from the forest of Finland and has a double lip to store pencils and small instruments. This Concert Stand tray is wider than the standard Double Lip Tray (60Q4) and can hold larger scores. The Single Lip Concert Tray is available (60Q3).

The concert stand tray can be custom stained to match the appearance of an auditorium.

Fully adjustable friction locks will automatically hold the stand's tray at the desired angle and height, meaning there are no knobs or levers to adjust or lose.

The stem and base are made from steel for strength and rigidity, without excess weight. This also ensures the stand will not sway. Rubber feet preserve the floor from damage.

# Product Features

The Concert Stand Pro Stem and Base is available and has a thumb screw for height locking so that heavier scores can be applied. The base is also weighted for added stability.

The design of the base allows the stands to be nested together which is ideal for when storage space is an issue. The Concert Stand Trolley is available and can store and transport up to 20 Concert Stands.

# Detailed Specification

## Specifier's description

Music stand with low profile base and tray moulded in one piece from solid natural birch wood. Tray has a double lip to hold pencils and other accessories. Wide tray to hold large scores. Stands can be nested on a flat floor without requiring a trolley. Rubber feet provide 3 point contact with the floor. Lever free locks for height and tray angle. Alternative pro stem available with chrome inner stem and locking thumb screw for height adjustment. Alternative pro base available made from weighted steel for added stability.
