

Performer3 Acoustic Screen

Part of the Performer 3 range, this height adjustable protection screen acts as an acoustic deflector by blocking sound waves from transmitting between musicians. It is extremely versatile and can be easily re-purposed as a music stand or tablet stand.

Product Features

The screen is manufactured from a 2mm thick transparent PETG screen which does not obstruct the musician's view. The screen is virtually unbreakable and extremely tough. The material is sturdy and can be easily cleaned.

The quick release tray lever enables the screen to be easily removed from the stand for storage. Alternatively, the stand can be re-purposed as a Performer3 Music Stand or a Universal Tablet Stand by simply attaching the different head sections.

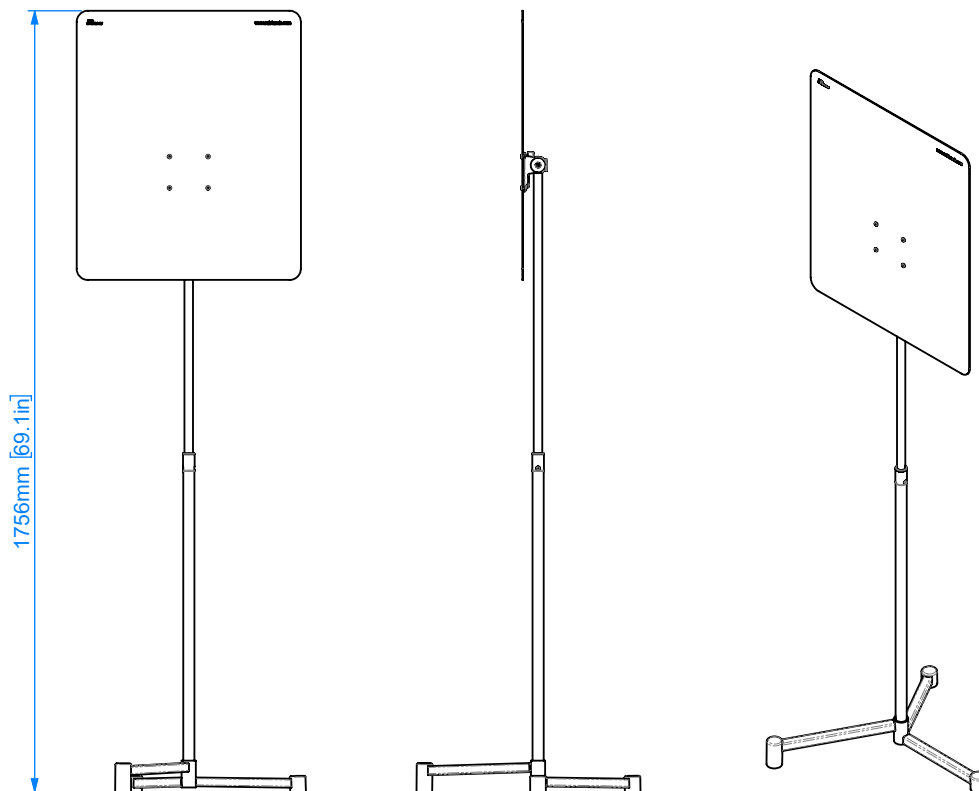

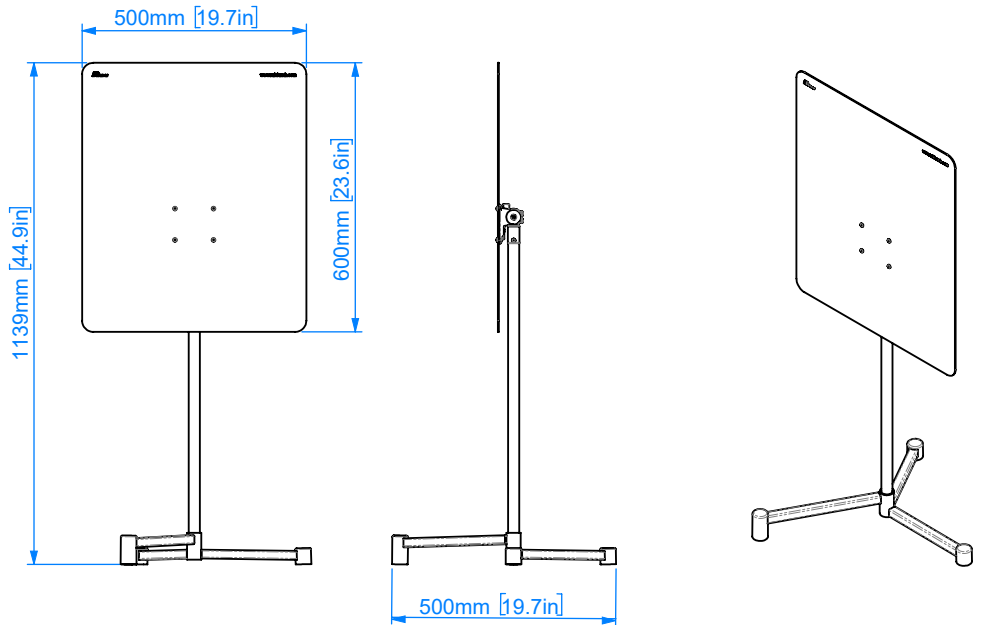

The steel stem is extremely strong and rigid, ensuring that this screen will not sway. Fully adjustable friction locks will automatically hold the screen at the desired height and angle, without the requirement of adjusting any thumb screws or levers.

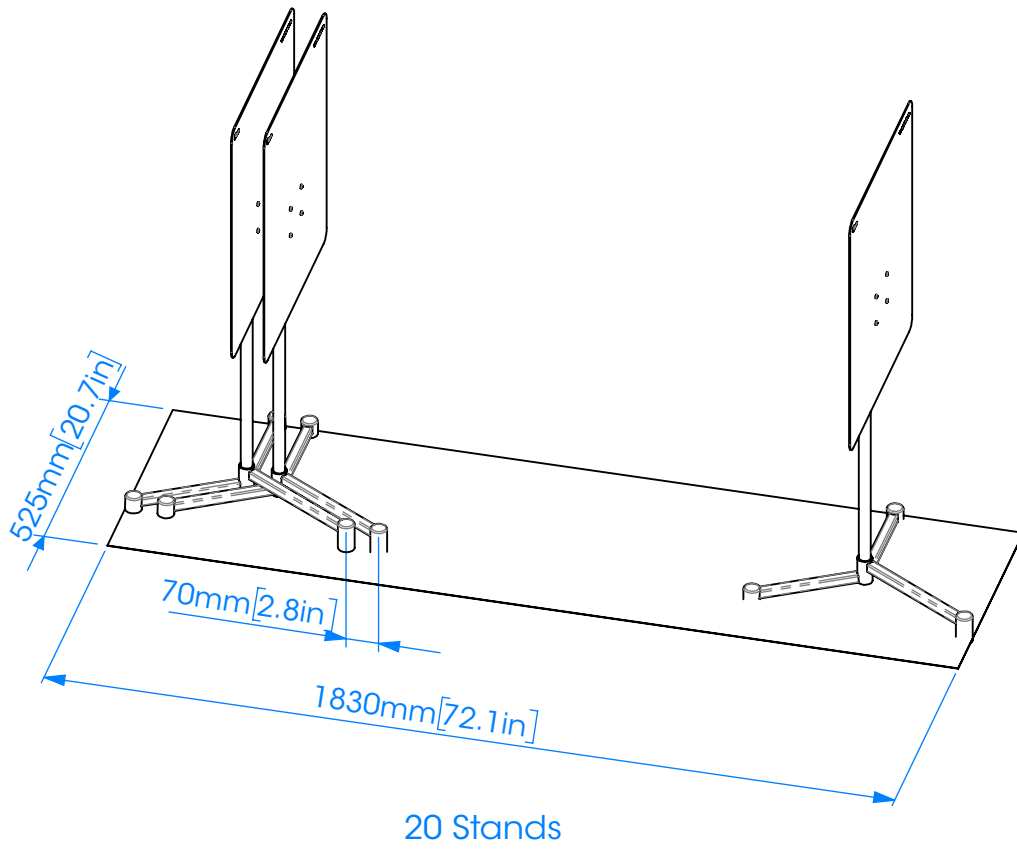

Rubber feet ensure 3-point contact on uneven surfaces, whilst protecting the floor and preventing clatter if the screens are knocked into. The screens bases can nest together tightly for compact storage. The Performer 3 Storage Trolley is available for storing or transporting the screens. (*Sold Separately).
